POLICY FOR ENVIRONMENT AND ENERGY PROTOCOL

Preamble

The institution is committed to promoting environmental sustainability and energy conservation. Through this policy, the college aims to reduce its carbon footprint, encourage responsible energy usage, and foster environmental awareness among students, faculty, staff, and the surrounding community.

Goals and Objectives

Energy-Efficient Infrastructure

- Ensure maximum usage of LED bulbs and other energy-efficient electrical appliances across the campus.
- Periodically replace conventional lighting systems with energy-saving alternatives.

Promotion of Public Transportation

- Encourage students and staff to use public transport for commuting to and from the institution.
- Promote carpooling and shared transport facilities wherever feasible.

Reduction of Vehicular Usage

- Motivate students and staff residing in nearby localities to walk or use bicycles instead of motorized vehicles.
- Provide safe pathways and bicycle-friendly infrastructure within the campus.

Environmental Awareness and Observance

- Observe environment- and energy-related days such as World Environment Day, Energy Conservation Day, and Earth Day.
- Conduct awareness programs, seminars, workshops, and campaigns to educate students, staff, and the general public.

Collaboration with Local Bodies

- Support local governing bodies and community organizations in planning and implementing energy-saving initiatives.
- Participate in community-based environmental conservation programs.

Support for Government Initiatives

- Actively support State and Central Government policies and programs related to energy conservation and environmental protection.
- Implement government-recommended best practices for sustainable energy usage on campus.

Implementation and Monitoring

The institution shall constitute an Environment and Energy Committee to oversee the implementation of this policy.

Regular audits and reviews will be conducted to assess energy consumption and environmental impact.

Continuous improvement measures will be adopted based on audit findings.

Conclusion

Through this policy, the institution reaffirms its responsibility towards environmental protection and sustainable energy management, aiming to create a greener campus and contribute positively to society.
